Device introduction

PD3000 PIPE&CABLE LOCATOR

1. Apply for the identification or route tracing of all kinds metallic pipe, power off/power on cable.
2. Compass display: to display pipe position directly.
3. Left/right arrow indication: use the left/right arrow to indicate the pipe position when route tracing.
4. Right/wrong indication: real - time test the pipe current direction to indicate tracing result and avoid the nearby lines interference.
5. Real-time depth measure and current measure.
6. History curve display: to display the signal variation directly.
7. Cable Identification: Clamp (optional) identification and sensor identification. Clamp identification can precisely gives accurate result. sensor (optional) identification could be used when the Clamp identification is not applicable.
8. Grounding fault location: Use the A frame (optional) to pinpoint the pipe insulation damaged points against the ground. No need to do zero set and the arrow will point to the fault point direction.
9. Digitization high accuracy sampling and processing,narrow receiving pass band to rise the anti-interference capability and suppress power interference and harmonic interference from nearby running cable and pipe.
10. Multiple locating frequency: active detection and passive detection.
11. Multiple signal output mode: Direct connection output, Clamp Coupling input, Radiation output.
12. Big capacity Li-on batteries series,support auto power off when low battery or long time no operation
13. Solid case and light weight easy to carry
